

Health Department Pesticide Spraying - Handheld / Backpack

State ID: MAA22

About this course

Description

This course is for those seeking to obtain the mandatory licence required to meet Health Department requirements for a Pest Management Technician licence if you are spraying chemicals for commercial gain. If only a backpack or hand held device is used for spot spraying then this course is suitable. It may lead to employment in Lawn & Garden, Landscaping, Bushland & Mine Site Rehabilitation.

Skills and knowledge elements include:

- Common weeds found in WA
- Common weed controls used in WA (following Integrated Pest Management strategies)
- Safe disposal of chemical residue and containers
- Correct Personal Protective Equipment for selected control measures
- Understanding a chemical label, schedules and use of chemicals
- Understanding Material Safety Data Sheets (MSDS)
- Groups of chemicals and their formulations

This course is delivered over 1 day.

Entry requirements

It is recommended that participants completing this course have significant prior knowledge and skills in spraying chemicals if looking to obtain a spraying license for lawn and garden, landscaping or mine site rehabilitation.

Certification

On successful completion of this course, students will receive a statement of attainment for the following nationally accredited units.

- AHCCHM303 Prepare and Apply Chemicals
- AHCCHM304 Transport and Store Chemicals
- AHCPMG301 Control Weeds
